

Linksys
**SPA-901/SPA-941/SPA-942/
WIP-330**

Much of the economic saving of desktop VoIP comes from the way that any standards based phone can be used on a properly implemented infrastructure, avoiding expensive vendor lock-in.

All of the phones that we sell are tried and tested by ourselves and known to work well in an open environment with other competent SIP implementations. As such, we are able to offer full support and installation assistance should this be required.

Focus on... Linksys

Our range of supplied Linksys VoIP telephones cater for casual residential or office use, right up to heavy office users or those in call centres.

comprehensive interoperability and SIP based feature set

Based on the SIP standard, the Linksys phones we carry have all been tested to ensure comprehensive interoperability with equipment from VoIP infrastructure leaders such as ipcortex. With hundreds of features and configurable service parameters, these phones address the requirements of traditional business users while leveraging the advantages of IP telephony. Features such as easy station moves, presence, and shared line appearances (across local and geographically dispersed locations) are just some of the many advantages of Linksys handsets.

Carrier-Grade Security, Provisioning, and Management

Linksys phones use standard encryption protocols to provide secure remote provisioning and unobtrusive in-service software upgrades. Linksys secure remote provisioning tools include detailed performance measurement and troubleshooting features, enabling network providers to deliver high quality support to their subscribers. Remote provisioning also saves service providers the hassle and expense of managing, pre-loading, and re-configuring customer premise equipment (CPE).

business basics - the Linksys SPA-901

The SPA-901 is a cost-effective and yet robust SIP phone, designed for wall mounting or low cost desk use.

It lacks an LCD display so features like caller identity or call progress indication, which are important for heavy office users, are not present. It does have good call quality and will auto configure from a VoIPcortex™ PABX to support the distinguishing features below.

distinguishing features

- Single line
- Line status indicator
- Call Hold
- Music on Hold
- Call Waiting
- Call transfer - Attended and Blind
- Three Way conferencing
- Multi-Party Call Conferencing via PABX
- Call Pick Up - Selective and Group
- Call Forwarding - Unconditional, No Answer, On Busy
- Call Return - Redial Last Caller
- Call Logs (60 Entries Each) Made, Answered and Missed Calls. Accessed via HTTP Server
- Redial Last Called Number
- Do Not Disturb (Caller Hears Busy Line tone)
- Built-in Web Server for Administration and Configuration, with User and Admin Access Levels
- 10 User-Downloadable Ring Tones - Ring Tone Generator free from www.Linksys.com
- Group Paging
- Ringer and Handset Volume Controls
- Wall mount or table top phone
- Easy installation with secure remote provisioning.

The classic - The Linksys SPA-941

The Linksys SPA-941 is a high quality but affordable SIP based executive desk phone. Featuring a large, hi-res pixel display, full duplex speakerphone, and 1 Ethernet Port. Standard features on the SPA941 include two active lines and a 2.5 mm head-set port. With a simple software update, the SPA941 is upgradeable to a four line phone. Each line can be independently configured to use a unique phone number (or extension), or can be configured to use a shared number that is assigned to multiple phones.

Stylish and functional in design, the SPA941 VoIP Phone is ideal for a residence or business using an IP PABX such as our range of VoIPcortex™ PABX units.

distinguishing features

- Affordable and full featured two or four line business class IP Phone
- Connect directly to an IP PABX
- Speakerphone, Caller ID, Call Hold, Transfer, Conferencing, and more
- Easy installation and secure remote provisioning.
- Menu based and web based configuration.

- One RJ-45 10BaseT Ethernet Port
- Hi-Resolution Pixel Based Display
- Four Soft Keys
- Larger Display vs. SPA841
- 128 x 64 vs. 128 x 48
- High Quality, Distinctive Cisco/Linksys Look

- Four line keys
- Handset with Solid feel
- Headset Port
- Full Duplex Speakerphone

the sophisticated - the Linksys SPA-942

The SPA-942 is equivalent to the SPA-941, but adds a backlit LCD screen, second ethernet port and power over ethernet (PoE).

Standard features on the SPA-942 include two active lines, dual switched Ethernet ports, 802.3af PoE support, a high resolution graphical display, speakerphone, and a 2.5 mm head-set port. With a simple software update, the SPA-942 is upgradeable to a four line phone. Each line can be independently configured to use a unique phone number (or extension), or can be configured to use a shared number that is assigned to multiple phones.

distinguishing features

- Fully featured two or four line business class IP Phone supporting Power over Ethernet 802.3af
- Connect directly to an IP PABX
- Dual switched Ethernet ports, Speakerphone, Caller ID, Call Hold, Conferencing, and more
- Easy installation and secure remote provisioning. Menu based and web based configuration

flexibility and mobility - the Linksys WIP-330

The Linksys WIP-330 Wireless-G IP Phone enables high-quality voice over IP (VoIP) service through a Wireless-G network and high-speed Internet connection. Connect at home, your office, or at a public hotspot, and make low-cost phone calls through your Internet Telephony Service Provider.

The handset features peer-to-peer dialing, speed dial, 3-way conferencing, call waiting, call transfer, and call forward, mute, hold and selectable ringtones. The large, full-color high resolution LCD display features an intuitive user interface enabling users to easily and quickly configure the handset when traveling within range of other Wireless-G networks so you can make VoIP calls wherever you go.

Handset stores the last 20 call history records and can save 250 phone book entries. Personalize your phone with a selection of ringtones that reflects your style.

distinguishing features

- Make Low-Cost High Quality VoIP Calls From Wireless Hotspots
- Easy Set-Up on WiFi Network
- Superior Range and Performance with 802.11g
- Intuitive User Interface
